We provide a comprehensive range of child, adolescent and family centred psychology and psychotherapy services that are evidence based. We seek to provide each of our clients with coping skills and life strategies that will positively impact on every aspect of your daily life.

Your GP may suggest a referral to a psychologist or cognitive psychotherapist and we accept referrals from all Health Centres and GP services. Your child's school or college may indicate they would like you to consider a parenting course or that your child might benefit from CBT or Psychological Assessment and we accept referrals from educational establishments. You may also avail of our services by completing the self-referral form.
